*Operating Dimensions

Bowie's Victor 1100 is available as a trailer, gooseneck or skid model. The **Bowie Victor 1100** is the choice for intermediate hydro-mulching jobs. The gooseneck makes hauling and maneuvering much easier and provides additional area for hauling the product to be sprayed. The skid model can be mounted on your own equipment, and the trailer model can be towed with a standard hitch.

The **Bowie Victor Hydro-Mulchers**® come standard with a shredder box and dual agitators for more production and less loading time. With this size of unit, you can go up to 600 lbs. of mulch per tank load and spray with a hose or from the deck using the ergonomic discharge cannon. The large access opening to the tank allows for easy and quick cleaning. The **Bowie Victor 1100** also features controls on the deck which can be used for ground level operation.
