Warranty

Bowie's Lancer 500 is used for the rapid application of hydro-mulch on residential lawns, new construction developments, and a multitude of smaller seeding projects. It is easily towed behind a pickup. The smaller size enables this Hydro-Mulcher to get into tight quarters. With a full size agitator, the **Bowie Lancer 500** will handle loads faster and work smoother without clogging than competitive machines of this size. The optional flush system, as shown above, is ideal for quick, clean flushing.
